NORTHWEST ENERGY STAR HOMES & **LEED for Homes**

Mountain Sun Homes – Designing and Building to a Higher Standard

By joining the ENERGY STAR and LEED for Homes Certified Homes, HomeSense and EcoWatch will work to exceed these (and other) higher building standards. It is our commitment to green construction, energy efficiency, and healthy homes for you. This is what we do!

Our homes will earn the Northwest ENERGY STAR recognition and can also be certified as a LEED for Homes level that we can determine together. Our target for the LEED Home is to be certified at Silver as a minimum. Together we can design and build a home to or even higher LEED certification level.

Your home will come with the following green benefits:

1. Will perform 10% better than the current Energy Code-using you **LEADERS**
2. Super-insulated, Transmission worthy (T3) home's thermal envelope
3. Insulated Recessed Recessed (RRR) Construction Super air tight and highly insulated and sealed. Home's Duct System for better high performance
4. Healthy paints, stains, and adhesives meeting LEED for Home standards
5. High efficiency Energy and Water Saver (EWS) for better high performance standard
6. ENERGY STAR and appliances meeting LEED for Home standards
7. Environmentally friendly and sustainable with materials such as bamboo or Recycled
8. Other green building features.
9. LEED Certified with an environmental neighborhood in Healthy with a smart plan!

And we can't stress this: Healthy! It is to share with you how we can provide the home you want, want, and will be proud of investing in!
